

复制粘贴样式

在控件和 Excel 中复制和粘贴时，对应的样式信息也将随之上附。

使用 `allowCopyPasteExcelStyle` 属性来设置是否在复制粘贴的时候附加样式信息。

比如：`(spread.options.allowCopyPasteExcelStyle = true;)`。

复制和粘贴时的样式也会随着浏览器的不同而不同。

下表展示了从 Excel 复制数据到 Spread.Sheets 时，样式的不同之处。

	Google Chrome	Mozilla Firefox	Microsoft Edge	Microsoft Internet Explorer	Safari on Mac	Chrome on Mac
backColor	支持		支持		支持	支持
foreColor	支持		支持		支持	支持
font	支持		支持		支持	支持
vAlign	top -> top center -> center bottom -> bottom justify -> bottom distributed -> bottom		top -> center center -> center bottom -> center justify -> center distributed -> center		top -> top center -> center bottom -> bottom justify -> bottom distributed -> bottom	top -> top center -> center bottom -> bottom justify -> bottom distributed -> bottom
hAlign	left -> left center -> center right -> right general -> general fill -> general justify -> general center across selection -> general distributed -> general		left -> left center -> left right -> left general -> left fill -> left justify -> left center across selection -> center distributed -> left		left -> left center -> center right -> right general -> general fill -> general justify -> general center across selection -> general distributed -> general	left -> left center -> center right -> right general -> general fill -> general justify -> general center across selection -> general distributed -> general
borderLeft	thin -> medium		thin -> medium		thin -> medium	thin -> medium
borderRight	medium -> medium		medium -> medium		medium -> medium	medium -> medium
borderTop	dashed -> mediumDashed		dashed -> mediumDashed		dashed -> mediumDashed	dashed -> mediumDashed
borderBottom	dotted -> dotted		dotted -> dotted		dotted -> dotted	dotted -> dotted
